CV SMART CHOICE *news*

Do you know someone interested in an Apprenticeship?

An apprenticeship is an excellent way to gain a nationally recognised industry qualification and valuable workplace skills, while earning a wage.

We are recruiting apprentices, who will be expected to continuously strive to develop their understanding and knowledge of CV parts, while providing exceptional service to our existing and expanding customer base. Blocks of study will take place at Reaseheath College in rural Cheshire, in their fully equipped workshops.

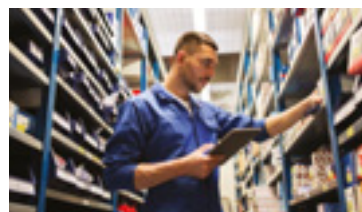

You may know someone who would be interested - a friend or relation who would welcome the opportunity to work with a progressive business while gaining qualifications? Please pass this on to them.

A Commercial Parts Apprentice works towards a Diploma in Vehicle Parts, Functional Skills, a Technical Certificate

and Employer Rights and Responsibilities (Intermediate to Level 2, Advanced to Level 3). Diplomas are split into units and assessed on an apprentice's knowledge and practical ability to do the job competently. Apprentices must be over 16 and work 30 to 40 hours per week (with statutory holidays). Apprenticeships last for 3 years.

Training units cover health and safety, handling customers, receiving, storing, selecting and issuing parts, processing returned goods and stock control.

If you know someone who may be interested, please ask them to contact us (details on the back cover), without delay, for further details.

Durite - NEW FORS Associate Supplier

Durite is the UK's leading brand in auto electrical parts for CV and general vehicles. With an impeccable reputation for supplying high quality parts, Durite is delighted to have become a FORS Associate Supplier.

The Durite brand is synonymous with quality products and outstanding customer service supplying CV vehicle workshops via factors such as the IFA.

As a FORS Associate Supplier, Durite offers expert CCTV kits, Telematics and Vehicle Safety Equipment, helping customers to build their Bronze, Silver and Gold memberships.

Durite has aligned its product development activity to the FORS criteria, using its extensive market knowledge to ensure customers operate using only the best performing products and services. Business Development Manager, Justin Normansell, said "From end-users to fleets there is demand to improve road safety which is a core focus for our business. FORS is at the forefront of road safety."

Visit www.durite.co.uk to see the full Durite range and call us (details on the back cover) to place your order.

Avoid illegal phone use!

Since 01/03/17 it has been illegal to use a phone while driving without hands-free access. The law applies even if stopped at traffic lights, queuing in traffic or supervising a learner driver. Penalties are now far more severe (details at www.gov.uk/using-mobile-phones-when-driving-the-law).

We have an extensive range of bluetooth hands-free solutions including Scosche, Parrot and Bury equipment, eg:

- **Parrot CK3100:** voice recognition, phonebook syncing, caller ID display, pairs up to 5 phones
- **Scosche MAGDMI:** Magnetic Dash Mount
- **Parrot MiniKit Neo:** Handsfree multipoint (2 phones), auto on/off, voice recognition

Call us (details on the back cover) for details of the full range and to order.

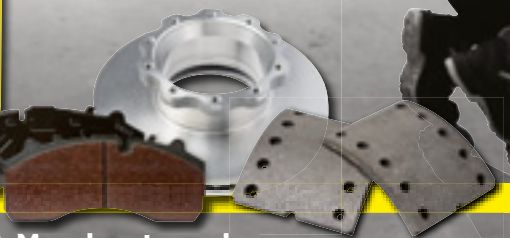

IT'S NOT THE PRICE THAT COUNTS

IT'S THE COST...

Downtime can be costly, minimising it increases profits

If brake pads have to be changed at every six weekly check, valuable time & money is being lost

Textar pads are proven to last longer than many cheaper pads - in some cases

Textar give almost twice the distance.

If you buy cheap, you may buy twice!

www.textar.com

WABCO

Trailer Diagnostics, EBS-E Braking, Training • Filtration

WABCO ACADEMY / E-LEARNING

Our experienced trainers in Batley, W Yorks, get you involved in our technical training, covering installation, diagnostics and maintenance of truck & trailer systems. Sessions include valuable hands-on experience via purpose-built test rigs and a fully equipped truck & trailer combo.

Use our E-Learning portal, to study some of our modules at a time and place to suit you.

Training courses include EBS-E (Electronic Braking Systems) as well as courses for older EBS-D (trailer) and EBS (truck & bus) systems.

Ask your local IFA Member for details

Trailer System Diagnostics

Essential kit for diagnosing trailer faults and changing trailer parameters (PIN code required)*.

Trailer Diagnostic Case (446 301 023 0)

- Trailer diagnostics (pictured)

Diagnostic Case (446 301 020 0)

- Truck and trailer diagnostics

*Attendance at a relevant WABCO ACADEMY training course in Batley is required to obtain the PIN code to change trailer parameters (see the green panel alongside)

Trailer EBS-E Retrofit

Upgrade your trailer from ABS to the latest EBS-E braking system*. **EVERYTHING** you need is included, right down to the fitting instructions.

EBS-E has been fitted as OE for 3-5 years. Substantial safety improvements over ABS systems include integrated Roll Stability and optional ECAS control**.

Trailer EBS-E Retrofit Kit

A modular system with fewer parts, easier to install on a new trailer or to replace an existing system on your current trailer. Supplied with or without PEM (Pneumatic Extension Module):

- Without PEM (480 102 929 2) - With PEM (pictured) (480 102 932 2)

*Note: Newly fitted Trailer EBS-E Retrofit Kit systems require programming & a commissioning sign-off. A WABCO Service Partner will do this free of charge - contact your local IFA Member or WABCO for details.
**Extra components required for ECAS functionality

OE Quality Filters

cumminsfiltration.com

Correctly specified filtration is critical to keep your truck out of the workshop. OE quality Fleetguard filters give your engine the protection it deserves. Without correct filtration, contaminant particles can:

- Reduce the lifespan of the costly high pressure fuel system & injectors
- Lead to complete fuel pump & injector failure & further engine damage
- Waste time & cause unnecessary expense

Safeguard the life of your critical components with Fleetguard's industry leading filtration technology

Metallic SCRs for Heavy Duty Vehicles

Dinex V-SCR is an effective and economical answer for CV NOx emissions control.

Reducing CV emissions is too important to risk fitting poor quality or low tech replacement parts.

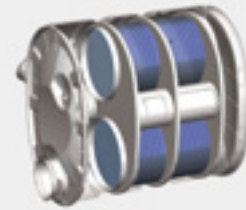

Dinex V-SCR (Vanadium based Selective Catalytic Reduction), already in the 4th gen of development, is world class technology utilising Metallic SCR with urea (AdBlue®) dosing to reduce NOx substantially. High temperature stability achieves excellent performance and durability.

Specifically designed to reduce NOx emissions at low temperatures (aided by NO₂), the Dinex V-SCR compensates for restricted catalyst space. Large surface area substrates and high washcoat amounts give high

conversion rates of harmful emissions from lower catalyst volume.

Metallic substrates feature in all of Dinex' SCR After Treatment Systems applications for the independent aftermarket. Metallic substrates offer advantages over cordierite such as lower backpressure (reducing fuel consumption), higher thermal conductivity (the catalyst reaches the core temperature more quickly) and higher mechanical robustness.

New Euro IV/V vehicle applications are tested for required emissions reductions at Dinex' Test & Validation Centre in Denmark.

TEBSG2 Modules & Diagnostics

'Silver Top' TEBSG2 Programmable Modules

Since its launch in 2007, the TEBSG2 product family has grown to 17 OE module variants, due to continual product development and customer specifications. Two circumstances arise in which the OE modules lack flexibility:

- When TEBSG2 modules require replacement
TEBSG2 modules are not compatible with each other, so while they can be fitted and piped up, the electronic brake calculation files are not interchangeable and a brand new aftermarket 'silver top' unit is required
- When the primary specification of a trailer changes
TEBSG2 are not reprogrammable, so a new TEBSG2 module is required

The solution is the Knorr-Bremse aftermarket range of TEBSG2 modules, sold with no brake calculation files. The correct file for the trailer is programmed on fitting (or reprogrammed when the primary specification of the trailer changes) using the KB915 diagnostic kit (see below). Knorr-Bremse TEBSG2 modules are easily distinguished by their silver tops (OE modules have black tops).

Five modules cover the 17 OE fits, as shown in the table:

TEBSG2 OE Fit	Module Type	OE 'Black Top' No.	Knorr-Bremse 'Silver Top' No.
G2.0 2007>2010	Standard	K019300, K019302, K019309, K019340, K019342, K019349	K019309B90
G2.1 2010>2014		K019310, K019312, K019350, K019352, K019359	K019319B90
G2.2 2013>		K055342, K055352, K055362, K055369	K055369B90
G2.2 2014>	Standard Plus	K055372	K055379B90
	Premium	K110612	K110619B90

Order from your local IFA Member

Common TEBSG2.2 parts also available from Knorr-Bremse:

- Combined Park Shunt Valve (composite)
- Lift Axle Control Valve (pneumatic control)
- Suspension Raise & Lower Valve
- ISO7638 Power Cable G2.2
- ISO7638 Socket Replacement
- Auxiliary In/Out 12 Way Connector G2.2

ECUtalk® Trailer Diagnostics Kit (KB915)

- Diagnoses & programmes all Knorr-Bremse Trailer EBS & ABS systems fitted as OE since 2001, so long as both the TEBS4 & TEBSG2 Licence PINs have been purchased
- No annual subscription fee
- Software updates available free-of-charge
- Includes full on-site training at the customer's premises provided by a Knorr-Bremse Representative
- Very comprehensive diagnostic tool:
 - Accesses DTCs
 - Quickly/easily produces printable reports
 - Carries out end-of-line tests
 - Performs individual component functionality checks
 - Programmes/mirrors ECU dpv files
 - and so much more!
