CV SMART CHOICE *news*

AD Oils & Brake Fluid

Issue 1 of CV Smart Choice featured AD Antifreeze & Coolants. The AD range goes much further to include AD oils - a wide range of motor oil grades, gear & transmission oils & hydraulic oil, as well as brake fluid. A wide range of pack sizes suit all users (20, 60 & 199 litre as well as 1 and 5 litre).

AD oils and brake fluid are manufactured by Cosan (Comma Oils) and are formulated in line with OE (original equipment) quality requirements.

All AD products are available only from the IFA, via your local branch. If you like high quality product at great value prices, call us.

We're high'light'ing buying garage equipment!

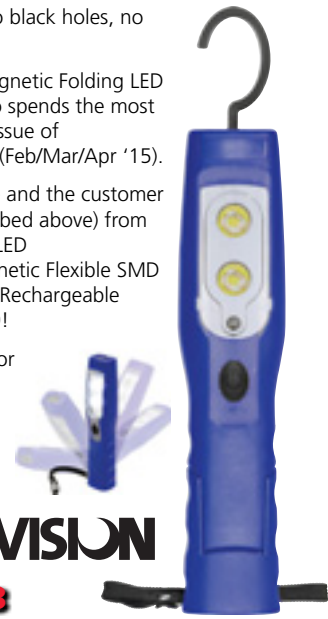

Hand lamps have a habit of disappearing (sucked into black holes, no doubt) making a new hand lamp always welcome.

We're giving away a FREE EHL190 180° Hi-Power Magnetic Folding LED Hand Lamp/Torch worth £27.13 to the customer who spends the most with us on garage equipment (from suppliers in this issue of CV Smart Choice) purchased & delivered this quarter (Feb/Mar/Apr '15).

Eleven fellow Members of the IFA are doing the same and the customer who purchases the most garage equipment (as described above) from all of us will also receive, FREE, 2 x EHL200 3W COB LED Hand Lamps/Charging Stands, 2 x EHL270 170° Magnetic Flexible SMD LED Lamp/LED Torches and 2 x EHL140 1W COB LED Rechargeable Pocket Lamps - in a further package worth over £130!

Each customer who qualifies to receive a FREE lamp (or lamps!) will be contacted in May and will need to answer a skill-based question correctly to be awarded their FREE lighting. Their local branch will deliver.

All of these great lamps are available to buy from your local branch. Just give us a call.

EHL190 180° Hi Power Magnetic Folding LED Hand Lamp/Torch **ONLY £27.13**

Outlook for the CV market in 2015 is bright

Buoyant van sales (up nearly 19% year-on-year) saw commercial vehicle registrations in 2014 return to pre-recession levels, despite truck sales falling by more than a quarter. Euro-6 regulations enforced from early 2014 combined with new Type Approval legislation at the end of year depressed fleet managers' willingness to make new truck purchases.

Mike Hawes, SMMT Chief Executive, recently suggested that the overall picture (11% growth in registrations, year-on-year) reflects the growing confidence of many UK businesses, going on to say that the outlook for 2015 is bright, with stability expected to return to the market this year.

The Commercial Vehicle Show at the NEC offers an opportunity for all those involved in the trade to catch up with the latest trends and developments. Entry is free - register at www.cvshow.co.uk

IFA CV Suppliers of the Year

Congratulations to Automint, who scooped Gold in the IFA's Supplier of the Year Awards 2015 and to Knorr-Bremse who won the Silver Award.

Automint and Knorr-Bremse were chosen for their quality of supply, performance, service and for looking after the needs of the IFA and thus the needs of our customers.

Brake Drums

WINNARD has been manufacturing CV brake drums since 1930. Call your local branch to order.

Drums
FROM ONLY £55 ea

What is ECE R90?

ECE R90 is a European Standard which ensures compliance of brake pads, linings and (since 01/11/2014) brake discs, manufactured for the aftermarket for many commercial vehicles (categories M, N & O). To gain approval under these standards "interchangeable parts" must be put through a series of tests and perform to similar levels as the Original Equipment.

Winnard braking products are classed as "interchangeable", defined by the ECE R90 regulations as a replacement with the same interface dimensions as the original, but which may differ from the original in terms of design, material composition and mechanical properties.

The ECE R90 standard for brake discs requires dynamometer testing along with on-vehicle testing to include:

- geometric, material & balancing provision checks
- wear condition marking
- integrity tests (thermal & high load)
- service brake vehicle performance tests

European Member States determine individually whether & when to adopt UN ECE standards. R90 has been adopted already by Germany.

An ECE R90 standard for brake drums is anticipated later this decade.
