CV SMART CHOICE *news*

Document holders letting you down?

Try NEW VTG Docuplate

Operators are familiar with the problems with current document holders - water ingress, light deterioration (making documents illegible), lost or stolen documents and difficulties with fitment.

These are serious issues - it is illegal to operate with illegible or missing documents, leaving operators with vehicles off the road (VOR). The current DVSA backlog for replacement documents is months and replacements are expensive, so a new solution is badly needed.

And here it is! The new VTG6 Docuplate is a weather and tamper resistant, universal fitting VTG6 document holder. The holder is made from fully transparent polycarbonate, offering extreme durability (30x the impact strength of standard acrylic sheet) and high scratch-resistance. UV stabilizers protect documents from light exposure and securely fitted O-rings ensure Docuplate resists the effects of weather and water, e.g. when washing trailers.

Once documents are inserted into the Docuplate and it is secured to the chassis, access to the documents is denied. Specifically designed to fit into existing manufactured location holes, Docuplate can be rotated at least eight different ways, ensuring it fits the desired position.

Another great solution from your local IFA Member! Just call us to order.

Above: a water/light damaged old-style VTG6 plate

Alongside: the NEW VTG6 Docuplate weather/tamper resistant solution available now from your local IFA Member

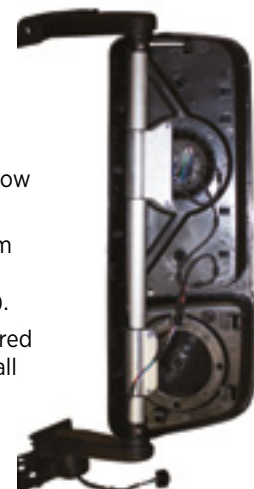

NEW Mercedes MP4 Replacement mirror

It's a challenge to make what appears to be a like-for-like replacement for a truck mirror, without infringing any of the multiple patents filed/held by the OEM. In creating a replacement mirror for the Mercedes MP4, Unitruck had a challenge to change relevant components without affecting the overall look. This took time, but the replacement parts are now available from your local IFA Member.

Choose from wide angle covers, a main cover and arm bracket covers, all sold separately. Long and short armed versions are available (with relevant OEM nos).

Mirrors are often broken, so the multiple savings offered over dealer prices over a vehicle's lifetime add up. Call your local IFA Member to cross reference and order.

Emissions cheat devices to be included in DVSA roadside lorry checks

From August 2017, DVSA roadside checks will include illegal emissions cheat devices, in an attempt to improve air quality.

DVSA's enforcement staff have evidence that drivers and operators use emissions cheat devices to cut the cost of operating. These include:

- use of devices that prevent emissions control systems from working
- removing the DPf or trap
- use of cheap, fake emission reduction devices or diesel exhaust fluid instead of AdBlue
- using illegal engine modifications which result in excessive emissions
- removing or bypassing the exhaust gas recirculation valve

Drivers and operators will have 10 days to fix the emissions system if the DVSA find it has been tampered with. If not fixed in that time, DVSA will issue a fine and stop the vehicle being used on the road. Repeat offenders may have vehicles taken off the road immediately.

Your local IFA Member can help with any parts, equipment and consumables needed to ensure your vehicle(s) pass these checks. Just call us.

CV Smart Choice Issue 12 Terms & Conditions: Offers end 31st October 2017. All offers subject to availability and change without notice. Certain featured products may not be stocked by all IFA Members. Call your local IFA Member with any stock or pricing queries. These offers cannot be used in conjunction with any other offer except at the discretion of your local IFA Member. All prices shown are exclusive of VAT. Pictures used are for illustrative purposes only and products are not shown at actual size or to scale. All product/marketing claims are the responsibility of the company on behalf of whom they are made and are not the liability of the IFA or its agents. E & OE.

All lease payment examples are based on a 60 month repayment period and with a NIL DEPOSIT facility. All lease figures quoted are subject to VAT and status. Alternative lease plans are available and can be tailored to your exact requirements. If you have any questions regarding lease facilities please call Alliance & General Leasing on 02476 220000.

Designed & produced for the IFA by Unbounded Ltd www.unbounded.co.uk

Replacing HID bulbs is easy - no need for the dealer to do it!

Paying too much for HID bulbs? SAVE MONEY - Buy from your local IFA Member!

While OE bulb prices remain high, Lucas has succeeded in reducing their HID bulb costs with no compromise to quality or performance!

Just like OE counterparts, Lucas HID bulbs:

- provide 200% more light on the road than standard halogens (2800-3500 lumens)
- offer the same average 2000 hours life
- come in a full range including bulbs for projector (S) & reflective (R) type optics

**Lowest EVER
HID bulb prices!**
Ask your local
IFA Member

Full range & application
guide online at
www.lucaselectrical.co.uk

Before you replace an HID bulb... ...did you know?

HID bulbs require a ballast & starter to generate the 26kV required for ignition. D1 & D3 bulbs include the starter in the base but the ballast is always separate.

Check the ballast before replacing a bulb:

A clicking/switching sound when operating the lights, indicates that the ballast is functioning, so it is the bulb that is most likely at fault.

No noise? Investigate the fuse and ballast **before** replacing the bulb.

HID Replacement Guide - it's as easy as 1-2-3

1

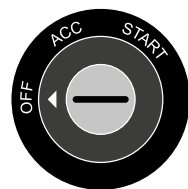

Safety First

Don't be put off by the high voltages (18kV to 30kV) associated with HID bulbs!

Just ensure you follow these three simple safety procedures before you start work

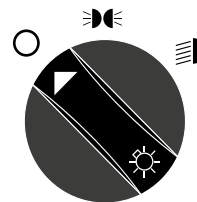

A

Turn off ignition
& remove key

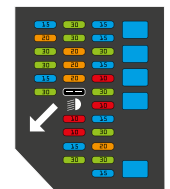

B

Turn off the lights
at the switch

C

Remove lighting
fuse(s) to isolate
the HID circuit

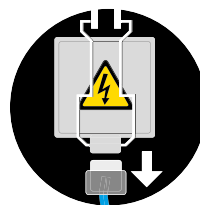

2

(Un)plug & Play

Access the bulb as per manufacturer guidelines, usually either from the back of the headlight, by removing the headlight or via the front wheel arch

D1 & D3

Pull out power connector
Release clasp & replace bulb

D2 & D4

Twist connector 45° to remove
Release clasp & replace bulb

3

Flip & Reverse

Always replace HID bulbs in pairs to ensure even colour temperature & brightness

Once both sides are replaced reverse step 1

Check headlights for function, level & alignment

GATES MICRO-V® KITS

Gates Heavy Duty Products OE Quality at Aftermarket Prices

**OE supplier of Accessory Belt Drive Systems
to leading truck & bus manufacturers**

One of the world's largest manufacturers of belt drive systems for cars/LCV, Gates role as a manufacturer and OE supplier of truck and bus accessory belt drive systems is less well known

Gates Extra Service Micro-V® Kits

**The right belts, the right tensioners, the right idlers
for each specific application - in a single box**

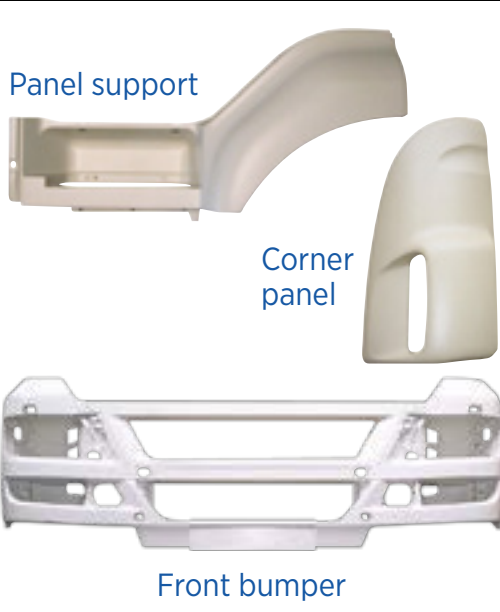

- Workshops are fitting Gates Extra Service Micro-V® kits increasingly as routine preventive maintenance
- Breakdown and rescue operators turn to Gates Extra Service Micro-V® kits as their first-call VOR solution
- The individual kit parts are also available separately

OE Quality replacement body panels for all makes

Primed, ready to top coat

Saves time & money when painting, for you and your customer!

NEW-TO-AFTERMARKET

Volvo Hand Brake Valve (961 724 225 0)

Technically identical to the OE hand brake valve, just with the original branding removed:

- Right hand drive
- Push button operated 3/2 control valves
- Used as a safety valve in a truck parking brake control system
- If a foot brake valve fails, the hand brake valve can be used for emergency braking
- OE no. 961 724 205 0
- Volvo no. 20367534

Volvo Air Dryer & Cartridge (432 425 105 0)

WABCO Cartridges - used on millions of today's vehicles, separate 99.95% of contaminant particles from the airflow, while retaining air braking system optimal functionality:

- Conventional cartridges for standard applications
- Air System Protector / Protector PLUS for added protection against oils & aerosols
- Long life cartridges are better than rival filters, even at the end of the recommended service life

HOT BULK DEALS
on air dryers & cartridges

YUASA

www.yuasa.com

The world's leading battery manufacturer

A GSYUASA Group Company

Up to 30% more cranking power than Cargo HD

Improved vibration resistance & greater deep cycle capability compared to Cargo HD & SHD

CARGO Range

Cargo HD (Heavy Duty)

- Power for cranking requirements & cyclic capability of smaller CV applications
- Supports standard electrical equipment installed in modern low spec CV

Cargo SHD (Super Heavy Duty)

- Greater power for cranking requirements & cyclic capability of larger CV applications
- Supports electrical equipment in higher spec CV (e.g. sleeper cabs with TVs, satellites, microwaves, nightlights, fridges, etc)

Cargo Deep Cycle

- Constant shift urban use vehicles, off-road, PSV & emergency
- Cranking power, higher cycling ability & vibration resistance cope with larger capacity CV engines
- Support high vehicle spec levels & added electrical loads (e.g. tail lifts, refrigeration units, loading mechanisms, etc)
- Glass mat separators - ultimate deep cycle capabilities
- Vibrolock plate fixing - superior vibration resistance

Expert Quality

NEW Hydraulic Spring Compressor (56191)

- All-steel construction
- Easy coil spring compression for safe/easy suspension unit dismantling
- Heavy duty, full safety cage
- High quality clamps/yokes securely grip wide range of springs
- Powerful hydraulic pump
- Totally independent operation (no power needed) so entirely mobile
- Coil spring capacity: 2 tonnes
- Dimensions: 520 x 690 x 1320mm
- Upper/lower base travel: 226/240mm
- Weight: 115kg
- Includes: 1 x Fixing jaw: 30 - 70mm
3 x Yokes: 75 - 110mm, 110 - 140mm, 140 - 190mm

Blue BS6580

- 2 Year life
- Older engines

Red OAT

- Premium 5 Year life
- Modern engines

Green HOAT

- Premium 3 Year life
- Modern engines

AD Antifreeze Dilution

AD Antifreeze must be diluted - the normal dilution rate is 1:1, which offers good freezing & corrosion protection (see table below).

The minimum recommended concentration to maintain corrosion protection is 33% by volume (freezing protection to -18°C, which may be insufficient for UK winters* & certainly for Eastern Europe).

Diluted with clean water, AD antifreeze can offer freezing protection to as low as -70°C where extreme winters are usual.

*Source: Met Office

Diluting AD Antifreeze

Antifreeze : Water (% Volume)	Freezing Protection
70 : 30	- 70°C†
60 : 40	- 53°C
50 : 50 (normal dilution)	- 37°C
33 : 66	- 18°C

†Blue BS6580 offers freezing protection to -65°C

Beware 'budget coolants'!

More product is required to achieve the same freeze point protection - often these products are fully diluted. So if you buy on price, you may be buying a great deal of added water! The price can look attractive, but compared like for like on performance it may be more expensive per litre.

Full concentrate: takes up less space, performs better, more economical in use!

Available only from your local IFA Member

205 litres

SCREEN WASH CONCENTRATE

De-ices & protects in extreme weather conditions, as low as -20°C

Swiftly removes insects & grease deposits encountered in summer driving

Tested independently, Polygard Screen Wash contains additives which are shown to inhibit the growth of Legionella bacteria

Windscreen washer bottle water has been identified as a possible source for transmission of Legionella bacteria which can cause Legionnaire's disease, a potentially fatal form of pneumonia.

Estimates suggest that up to 20% of all community acquired sporadic cases of Legionnaire's disease are strongly associated with windscreen washer fluid containing no screen wash†.

Simply using screen wash may prevent transmission of Legionella bacteria to drivers and passengers. Use of screen wash demonstrates a duty of care to professional drivers.

PROHEAT Oil Fired Cabinet Package with Built-In Fuel Tank & Flue Kit

- Use with 28 second fuel (paraffin/kerosene) or 35 second fuel (heating oil/diesel)
- All models 240V
- Low-noise radial fan
- Equipped with thermostat
- Capacities of 30, 42, 64, 84kW net
- 4-Sided adjustable outlet opening guarantees equal air distribution
- Summer/winter circuit for heating/ventilation

Model	Nett Heat Output	Max kW	Consumption	Air Flow	Tank Capacity
PROHEAT30	104,000 Btu/hr	30kW	3.4 L/hr	1,900 m ³ /hr	55L
PROHEAT40	144,000 Btu/hr	42kW	4.7 L/hr	2,800 m ³ /hr	55L

91% HEATER EFFICIENCY

FLUE KIT INCLUDED

No space for a bulk fuel tank? PROHEAT is your solution!

Stainless Steel Flue Kit INCLUDED:

- Gives approx. 5.2m (17ft) ground clearance
 - 4 x 1m Flue pipes
 - 1 x Terminal
 - 2 x Adjustable wall fixing brackets
 - 1 x High temperature silicone rubber roof seal & fixing kit for profiled or corrugated roof & cladding
 - 1 Tee-Piece (flue to heater)
 - Additional 1m flue pipe available:
- | For Model | Price |
|-----------------|------------|
| PROHEAT30,40,60 | £30 |
| PROHEAT80 | £37 |

Automatic Ignition Universal Oil Fired Heaters

- Clean combustion & high efficiency
- Large airflow blower fans
- Fan-only facility for summer ventilation
- Large capacity fuel tanks
- Basic room thermostat is standard
- Optional digital thermostat/time control
- Compressed air supply required for burner

Model	Heat Capacity	Fan Capacity	Fuel Tank	Consumption	Compressed Air Displacement	Supply
SB40	153,000 Btu/hr	3200 m ³ /hr	80 L	4.6 L/hr	1.0 - 1.3 CFM	230V

91% HEATER EFFICIENCY

Suspended Unit Heaters Heating Oil, Natural Gas or Propane

- Oil Fired: heat capacities 31kW to 98kW
- Gas Fired: heat outputs 15kW to 84kW with roof or wall flue exit
- Suspend or mount (on a suitable non-combustible support)
- Four M10 suspension points provided
- Free-blowing or ducted models
- Installation service (in most areas)

THE UK'S LEADING SUPPLIER OF GARAGE EQUIPMENT...

► Tecalemit CV Brake Tester (DE 9700)

- 15kW Motors with 'soft start' to reduce mechanical stress, extending life of motors & gearbox components
- Supplied in 2 person or 1 person operation format
- Approved for ATF & ATL MOT testing of Class IV, VL & VII vehicles
- Roller bed design reduces length of chain drive to eliminate need for frequent tension adjustment
- Simple intuitive controls & operation via RF touch screen remote control or PC workstation
- Extra-large centre rollers ensure continuous contact with road wheels, regardless of tyre tread design
- Bi-directional testing
- User option of automatic or manual mode
- Capability for operator to construct vehicle database
- Roller lock to allow easy exit of driven axle from brake tester
- Pre-loaded with latest DVSA vehicle database

DVSA approved for ATF testing

Possibly the best specified brake tester on the market today

Purpose designed specifically to meet UK testing standards

Supported throughout the UK by Tecalemit after sales Engineers
